ACC655

Junction Box Cover

FOR IN-LINE ELECTRICAL OUTLET COUPLER INSTALLATIONS

The Peerless-AV® ACC655 Junction Box Cover is a powder-coated steel enclosure that pairs with the ACC850 In-Line Electrical Outlet Coupler to bring a clean, finished power location to any 1-1/2"–11.5 NPT ceiling drop-column display installation. Line-voltage within electrical conduit and/or low-voltage wiring routes through the center of the column into the cover, where it terminates at a standard field-supplied single-gang electrical box and face plate. Sized to accept industry-standard boxes and plates, the ACC655 gives integrators a familiar, code-friendly wiring path without introducing a mixed-vendor component into an otherwise all-Peerless-AV column, mount, and plate build. Finished in black powder coat to match Peerless-AV AEC and EXT extension columns.

- Powder-coated steel construction for durability and a clean, finished appearance
- Attaches directly to the Peerless-AV® ACC850 In-Line Electrical Outlet Coupler
- Houses a standard single-gang electrical box with tapped holes to accept industry-standard face plates
- Through-column wiring path routes conduit line-voltage and/or low-voltage cabling for a clean, NEC-friendly installation
- Black powder-coat finish matches Peerless-AV® AEC (adjustable) and EXT (fixed) extension columns
- Includes mounting hardware (screws and washers) to attach to the coupler and electrical box

Note: This product is intended for use with UL Listed products and must be installed by a qualified professional installer a qualified professional installer
